CROCHET PATTERNS

SUS SPACE CREWMATE

Detailed Crochet Amigurumi Pattern

LEVEL	FINISHED SIZE	HOOK
Intermediate	Approx. 9 cm	3.0 mm

Make a small red crewmate with a backpack, a light-blue visor, a black outline and a white highlight. This guide includes the written pattern, assembly order and reference photographs.

Pattern note: The supplied pattern leaves some shaping details unspecified. Those points are clearly marked in this guide so the written instructions are not mistaken for a tested step-by-step method.

1. Materials & abbreviations

Gather the following materials before you begin. The source does not provide yarn quantities.

Material	Use
Red medium cotton yarn	Body and backpack
Light-blue medium cotton yarn	Visor
Black medium cotton yarn	Visor outline
White medium cotton yarn	Highlight
3.0 mm hook	All pieces
Polyester stuffing	Body filling
Yarn needle	Closing and sewing
Stitch marker	Marks the start of each round
Scissors	Cutting yarn

Abbreviation	Meaning
MR	Magic ring
ch	Chain
sc	Single crochet
inc	Increase: 2 sc in one stitch
dec	Invisible decrease
BLO	Back loop only

Yarn quantities: Not specified. Weigh the yarn used on a finished sample before listing grams or metres.

2. Before you begin

Work in continuous rounds and keep a marker in the first stitch. The “Total” column is the stitch count expected at the end of each round.

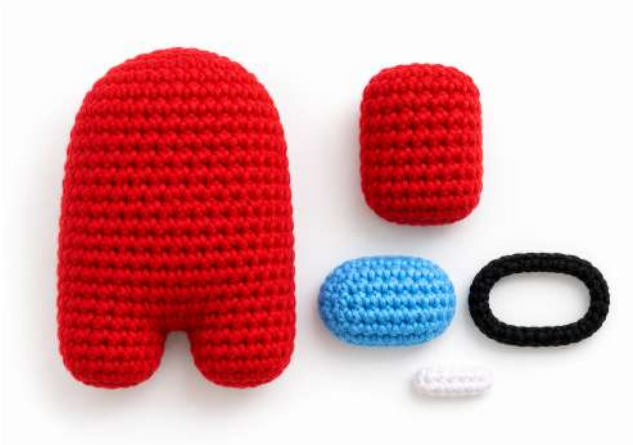

Notation	Meaning	Total
6 inc	Increase in each of 6 stitches	12
(1 sc, inc) x 6	1 sc + 1 increase, repeated 6 times	18
(2 sc, inc) x 6	2 sc + 1 increase, repeated 6 times	24
(3 sc, inc) x 6	3 sc + 1 increase, repeated 6 times	30
(3 sc, dec) x 6	3 sc + 1 decrease, repeated 6 times	24 (from 30)

Working routine: Count every round. Move the marker only when the next round starts. Add stuffing gradually. Pin each separate piece before sewing so you can check its placement.

3. Body - red yarn

Crochet in continuous rounds and stuff as you go.

Round	Instruction	Total
R1	6 sc in MR	6
R2	6 inc	12
R3	(1 sc, inc) x 6	18
R4	(2 sc, inc) x 6	24
R5	(3 sc, inc) x 6	30
R6-R12	30 sc	30
R13	(3 sc, dec) x 6	24
R14	(2 sc, dec) x 6	18
R15	(1 sc, dec) x 6	12
R16	6 dec, fasten off, leave a tail	6

Reference photograph: body and separate components. Generated visual aid; follow written stitch counts.

Finish the body

Close the opening with a yarn needle. Spread the stuffing evenly before pulling the yarn tight.

Leg shaping - source detail missing: The finished body shows two short legs separated by a center gap. The supplied pattern only says to shape the legs gently; it does not specify stitch division, needle path, gap depth or width, or separate leg rounds. A physical test is needed before this can be presented as a reproducible method.

4. Backpack & visor

Backpack - red yarn

Round	Instruction	Total
R1	5 sc in MR	5
R2	5 inc	10
R3-R5	10 sc	10

Finish and attach: Fasten off and leave a long tail. Position the backpack on the center back of the body. Pin it first, inspect it from the back and both sides, then sew it securely and weave in the yarn end.

Stuffing: The source does not say whether the backpack is stuffed. Use only the method physically tested on your sample.

Light-blue visor

Round	Instruction	Total
R1	6 sc in MR	6
R2	6 inc	12
R3	(1 sc, inc) x 6	18
R4	(2 sc, inc) x 6	24
R5	24 sc	24

Visor, black outline and white highlight - reference detail.

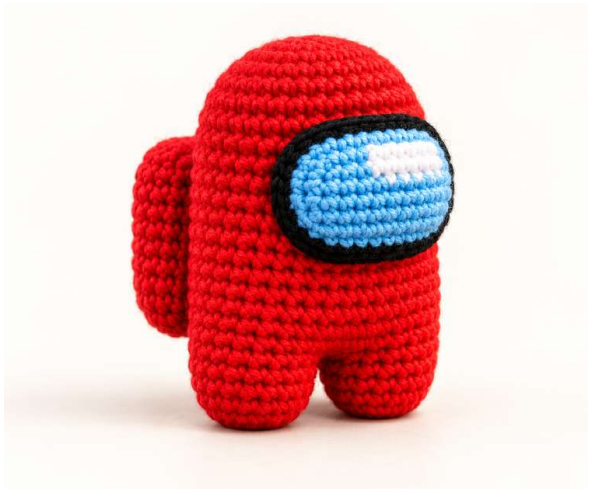

Black outline: Make a chain long enough to go around the visor. Form an oval, join it, and sew it around the blue piece. **White highlight:** Make 6 sc in MR, fasten off, flatten slightly, and sew onto the upper-right of the visor.

Visor details to test: The source gives no exact outline chain count and does not explain how the circular visor rounds become the oval finished piece. Record both from a physical prototype.

5. Assembly

Pin the pieces in place before sewing. Check the front, back and side alignment, then sew permanently.

Step	Action
1	Sew the backpack to the center back.
2	Position the visor in the center front of the body.
3	Sew on the black outline, then the blue visor inside it.
4	Add the small white highlight and weave in all ends.

Front view

Back view - backpack placement

Reference photographs are generated visual aids showing the intended front and back appearance. Follow the written pattern for construction.

6. Final result & quality check

Use this list to inspect the finished crewmate before sharing or gifting it.

Check	Confirm
Body	Even stuffing and securely closed
Leg area	Use only a physically verified shaping method
Backpack	Centered and securely sewn
Visor	Centered on the front
Black outline	Even around the blue visor
White highlight	Upper-right and secure
Ends	All hidden and woven in

Details to complete from a physical sample

The source provides the body, backpack and visor round counts and the assembly order. Before presenting every part as fully tested, record these details from a sample:

- Leg shaping method, with step photographs
- Yarn quantities per color
- Whether the backpack is stuffed
- Black outline chain count
- How the circular visor rounds form an oval
- Photographs taken from your own prototype

Leg-shaping photo checklist

Photo	Required view
A	Completed body before shaping
B	Exact center marking
C	Exact needle, sewing or shaping method
D	First leg formed
E	Second leg formed
F	Front, side and bottom finished views

Assembly order: Body → Backpack → Visor and outline → White highlight. The visual photographs are generated illustrations; they do not replace missing stitch counts or a tested shaping method.
